

GOVERNMENT OF SAINT LUCIA
MINISTRY OF FINANCE
CUSTOMS & EXCISE DEPARTMENT

NOTICE
NO. 5 OF 2012

TO: ALL DECLARANTS

THE FOLLOWING NEW FEATURES HAVE BEEN
INTRODUCED IN ASYCUDA WORLD
FROM MAY 30 2012:

- 1. Clearance office codes will be decentralised to reflect precise the location of the goods or where the transaction is being conducted. Declarations are to be prepared based on location of the consignment.**
- 2. The SAD now contains an option allowing the declarant or Broker to include *multiple waybills or Bill of Lading numbers from the same manifest with one SAD*. This feature is particularly important and will be made mandatory for Courier companies and other entities involved in the clearance of express packages.**
- 3. The SAD will now allow the upload of scanned copies of documents in *PDF, PNG, BMP and JPEG* file formats. The option will be available in the attached documents and suppliers tabs.**
- 4. ASYCUDA WORLD now includes an automatic selectivity feature. At five minute intervals the system will perform selectivity on applicable SADs after payment. However, the declarant or Broker still maintains the ability to perform an immediate selectivity request on his/her declaration.**

Please be guided accordingly.
